

132065 to 132084.—Continued.

A hardy perennial violet with short stems, ovate, crenate leaves having long channeled petioles, and a single large pale-yellow flower on a stout scape-like peduncle. Native to the Altai region, Siberia.

For previous introduction see 123417.

132084. *ZIGADENUS ELEGANS* Pursh. Melanthiaceae.

132085 and 132086.

From England. Plants purchased from George Pyne, Topsham, Devon.
Received March 27, 1939.

132085. *PRUNUS ARMENIACA* L. Amygdalaceae. Apricot.
Blenheim apricot.

132086. *RUBUS* sp. Rosaceae.
Pyne's Imperial raspberry.

132087 to 132104. *PYRUS* spp. Malaceae. Pear.

From Massachusetts. Scions presented by Alfred Rehder, Arnold Arboretum, Jamaica Plain. Received March 27, 1939.

132087. *PYRUS AMYGDALIFORMIS* Vill. Malaceae. Almond pear.

132088. *PYRUS AMYGDALIFORMIS* Vill.

Var. *Cuneifolia*. A form with small narrow leaves with a slender tapering base.

132089. *PYRUS AMYGDALIFORMIS* var. *PERSICA* (Pers.) Bornm.

A variety with oblong leaves up to 3 inches long and depressed globose fruits about 1 inch in diameter. Native to western Asia.

132090. *PYRUS BALANSAE* Decaisne.

For previous introduction see 29972.

132091. *PYRUS CALLERYANA* var. *FAURIERI* (C. Schneid.) Rehder.

A variety smaller in all its parts than the type; the leaves are sometimes broadly cuneate at the base and rather thin. Native to Chosen.

132092. *PYRUS COMMUNIS* var. *CORDATA* (Desv.) Hook. f.

A variety with suborbicular to ovate, subcordate leaves about 1 inch across.

132093. *PYRUS COMMUNIS* L.

Var. *Cotinifolia*.

132094. *PYRUS COMMUNIS* var. *PYRASTER* L.

A form of the common pear having fruits the size and shape of a cherry, originating in the northeastern part of Iran (Persia).

For previous introduction see 33172.

132095. *PYRUS ELAEAGRIFOLIA* Pall.

An ornamental wild pear native to Asia Minor, which becomes a large bush or small tree. The leaves are lanceolate, oblong-lanceolate, or linear-lanceolate and covered with a whitish silky pubescence. The small white flowers appear in May, and the small globose fruits are crowned with a prominent calyx.

For previous introduction see 108769.

132096. \times *PYRUS MICHAUXII* Bosc.

A natural hybrid between *Pyrus amygdaliformis* and *P. nivalis*, native to Asia Minor. The shining leaves are ovate-oblong, and the small clusters of white flowers are followed by turbinate, greenish-yellow fruits.

For previous introduction see 54099.
